

Aarushi Choudhary

3A COMPUTER SCIENCE AT UNIVERSITY OF WATERLOO

(548)-333-9212 | [Linkedin](#) | a6choudh@uwaterloo.ca | [GitHub](#) | [Personal Portfolio](#)

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, Java, HTML, CSS, JavaScript, MySQL, PostgreSQL, Bash/Shell Scripting, R
- **Tools:** Power BI, Tableau, Git, GitHub, Figma, Canva, Jenkins, Gradle, VS Code, Jupyter Notebook, Google Collab
- **Cloud Technologies:** AWS S3, AWS Amplify, AWS EC2, Docker, Microsoft Azure ML, Azure Cognitive Services
- **Frameworks / Libraries:** Pandas, NumPy, Matplotlib, Scikit-Learn, ReactJS, NodeJS, ExpressJS, PyTorch, Flask
- **Other technical skills:** Design Patterns, UML and Flow Chart diagrams, API documentation, CI/CD pipelines
- **Soft Skills:** Communication skills (written and verbal), Teamwork, Problem Solving, Critical Thinking, Time Management, Presentation Skills, Leadership, Mentorship, Independent Learning, Adaptability

EXPERIENCE

AKXA Tech Ltd.

Jan - Apr 2026

Data Engineer

Remote

- Built and shipped a **data analysis web app** using **React.js (Vite)** and **Python** that allows users to upload Excel files, define custom formulas, and run aggregations, cutting down repetitive spreadsheet work and speeding up common tasks by **~35%**.
- Developed **data processing workflows** with **Pandas** and **NumPy** to handle datasets with **10K+ rows**, and **trained classification and regression models** using **Scikit-learn** to support client-specific analysis and improve result reliability **~20-25%**.
- Applied practical data science techniques after researching real-world use cases, and created end-to-end data visualizations using **Matplotlib** and **Jupyter Notebooks** reducing analysis turnaround time **~30%** and improving stakeholder interpretability.

AKXA Tech Ltd.

May - Aug 2025

Software Engineer

Remote

- Developed a full-stack **Worker Management System** using **React.js**, **Next.js**, **Express.js** and **MySQL**, centralizing worker, trade, and training records across **20** teams, improving data accessibility and consistency.
- Implemented automated alerts, Excel report exports, and compliance dashboards to **streamline workforce monitoring** and eliminate manual tracking, saving **30+** hours per month.
- Enhanced **UX** with interactive graphs, filtering, and sorting to create an intuitive User Interface increasing system adoption by **40%** and establishing the system as the primary workforce tool.

Microsoft Azure & Artificial Intelligence Fundamentals, (WE) Accelerate Program

May - Aug 2024

AI/Cloud Solutions Architect

Waterloo, ON

- Proposed and designed an **AI-driven investment coach** using **Microsoft Azure ML** and **Azure Cognitive Services** to deliver personalized investment predictions, projecting a **70%** improvement in decision accuracy.
- Built predictive models and real-time forecasting workflows to enhance investment reliability for novice and experienced investors, increasing user confidence in Financial recommendations.
- Delivered **5** project milestones by designing reproducible **ML workflows** and presenting system architecture to align solutions with client KPIs ensuring timely and efficient project delivery.

PROJECTS

Investo | C++, React.js, Next.js, Git |

An Investment-portfolio app

- Built a **full-stack investment advisory platform** using **Next.js** and **React.js** that evaluates user inputs such as goals, risk, etc. to recommend **aligned investment strategies** and **portfolio allocations**.
- Designed a structured **recommendation engine** to convert questionnaire responses into investor profiles, enabling targeted selection of suitable investment strategies.
- Developed a backend system in **C++** with **MySQL** to incorporate market data and generate **near real-time portfolio insights**, and integrated an **AI chatbot** to explain recommendations and handle user queries.

DataPilot | Python, React.js, Next.js, Git |

A Data Analytics web app

- Designed and launched a full-stack web application with **React.js (Vite)** and **Python** that enables users to import Excel datasets, create reusable formulas, and execute automated aggregation workflows.
- Built an interactive spreadsheet analysis interface and data-processing backend to simplify recurring Excel operations and improve overall workflow efficiency.

EDUCATION

University of Waterloo

Sep 2023 - Apr 2028

Bachelor of Computer Science, Honours, Co-op

- Received President's Scholarship and Faculty of Mathematics Global Scholarship
- Relevant Courses - Object-Oriented Programming, Data Structures & Algorithms, Statistics, Combinatorics, Probability, Operating Systems

CERTIFICATIONS

Microsoft Certified

Microsoft Azure Fundamentals (AZ-900)

- Foundational Cloud knowledge including core Azure Services, Cloud concepts and scalable deployment.

Azure AI (AI-900)

- AI workloads, Azure Cognitive Services and Machine Learning implementations in Cloud Environments.
